Miguel Maria Pinto Lunet
PhD Candidate at FEUP

miguel.lunet@inesctec.pt (+351) 914 325 782

Identification

Name: Miguel Maria Pinto Lunet
Date of Birth: 13 May 2002
Nationality: Portuguese
Current Residence: Porto, Portugal

LinkedIn: Miguel Lunet
CIÊNCIA ID: B81F-4BE7-113C
ORCID: 0009-0003-1794-7743
Scopus Author ID: 60012649200
Google Scholar: 88ZjLHEAAAAJ

Education

Faculty of Engineering, University of Porto — Porto, Portugal
PhD — September 2025 - September 2028
Dissertation: Integrating Operations Research and Reinforcement Learning for Policy Development in Sequential Decision-Making Problems
Distinctions: Awarded an FCT PhD Grant (Fundação para a Ciência e a Tecnologia), ranked 1st out of 164 candidates.

Master. GPA: 18.0/20 — September 2023 - July 2025
Dissertation: Policy Development for Contemporary Sequential Decision-Making Problems in Transportation and Inventory Management. Grade: 20/20
Relevant Coursework: Business Analytics; Optimization; Econometrics.

Bachelor. GPA: 16.3/20 — September 2020 - July 2023
Relevant coursework: Math; Economics; Statistics; Energy; Operations Management; Programming.

University of Edinburgh — Edinburgh, Scotland
Optimization Under Uncertainty — June 2026

Università di Padova — Padova, Italy
10th AIROYoung Workshop and PhD School — February 2026

UiT The Artic University of Norway — Tromsø, Norway
Deep Learning Winter School — January 2026

Univeristy of Aalborg — Aalborg, Denmark
Mixed methods and interdisciplinary inquiry — November 2025

IESE Business School — Barcelona, Spain
EWG PhD School on Retail Operations and Analytics — September 2025

Università di Trento — Trento, Italy
VeRoLog PhD School on Vehicle Routing and Logistics Optimization 2025 — June 2025

Technical University of Delft — Delft, The Netherlands
Erasmus. 8.5/10 — September 2023 – January 2024
Relevant coursework: Multi-criteria decision analysis; Multimodal transportation systems.

Certifications

- Professional Scrum Master I (certified by Scrum.org), 2023
- Lean Six Sigma Green Belt (certified by ESTIEM and Dr. Gregory Watson), 2023

Professional Experience

INESC TEC Porto, Portugal
Researcher since April 2024
Research on Sequential Decision-Making and Explainable AI applied to the areas of transportation and inventory management. Published in the International Joint Conference of Artificial Intelligence (IJCAI 2024) and the Genetic and Evolutionary Computation Conference (GECCO 25).

YES!Delft Delft, The Netherlands
Student and entrepreneur September 2023 – January 2024
Affiliated with the "Ready to startup"program, my team and I developed an idea focused on optimizing user screen time. We gained vital business-building knowledge and tools led by industry pros, including Roland Berger experts and alumni.

European Students of Industrial Engineering and Management (ESTIEM) Europe
Instructor responsible February 2023 – September 2024
Responsible for managing a network of 200+ instructors throughout Europe, allocating them to courses, and ensuring communication between instructors and the central team.

Renault Cacia, Portugal
Trainee in the digital transformation taskforce July 2023 – August 2023
Developed a Lean Six Sigma Green Belt project to increase operations data reliability and integrity on three axes: data collection (using a radio frequency or voice system), processing, and exportation.

Jerónimo Martins Alfena, Portugal
Trainee in the operations team February 2023 – June 2023
Developed a Lean Six Sigma Green Belt project to increase operations data reliability and integrity on three axes: data collection (using a radio frequency or voice system), processing, and exportation.

Research

Research projects

PEER (The hyPEr ExpeRt collaborative AI assistant)
Researcher since October 2024
PEER focuses on how to systematically put the user at the centre of the entire AI design, development, deployment, and evaluation pipeline, allowing for truly mixed human-AI initiatives on complex sequential decision-making problems.

TRUST-AI (Transparent, Reliable and Unbiased Smart Tool for AI)
Researcher April 2024 - March 2025
TRUST-AI consists in involving human intelligence in the discovery process, resulting in AI and humans working in concert to find better solutions (i.e., models that are effective, comprehensible, and generalisable). This is made possible by employing explainable-by-design symbolic models and learning algorithms, and by adopting a human-centric, guided empirical learning process.

Published work

1. Lunet, M. (2026b). The human factor. why do people ignore algorithms? *Analytics Magazine (INFORMS)*

2. Lunet, M., Neves-Moreira, F., Arrais, R., Maganinho, S., Borges, F., Sottomayor, M., Lopes, M., Asadi, M., Erdt, L., Durnerin, E., and Gardette, J. (2026c). Integrating in-store picking with timely product suggestions. Poster presented at the PEER Project Review Meeting. Poster session

3. Lunet, M., Neves-Moreira, F., Arrais, R., Maganinho, S., Borges, F., Sottomayor, M., Lopes, M., Asadi, M., Erdt, L., Durnerin, E., and Gardette, J. (2026d). Product localization and digital twin update using gen ai. Poster presented at the PEER Project Review Meeting. Poster session

Communications

1. Lunet, M., Schrotenboer, A., Neves-Moreira, F., and Amorim, P. (2026f). Routing and scheduling offshore maintenance operations with crew splitting and transfers. Presented at VeRoLog 2026, Bath, UK. Oral presentation (15 minutes)

2. Lunet, M., Fernandes, D., Neves-Moreira, F., and Amorim, P. (2025b). Symbolic pricing policies for attended home delivery – the case of an online retailer. Presented at Genetic and Evolutionary Computation Conference (GECCO), Málaga, Spain. Oral presentation (15 minutes)

3. Lunet, M., Neves-Moreira, F., Buisman, M., and Amorim, P. (2025c). Sequential decision-making in the inventory management of port wine. Presented at IEMS '25 - 16th Industrial Engineering and Management Symposium, Porto, Portugal. Oral presentation (15 minutes)

4. Lunet, M. (2023). Identification and resolution of integrity and reliability issues in the data of jerónimo martins' distribution centers' operations. COPEGI'23 - Congresso de Projetos em Engenharia e Gestão Industrial, Porto, Portugal. Oral presentation (7 minutes)

Evaluations

1. Lunet, M. (2026a). Congresso de projetos de engenharia e gestão industrial (copegi). Bachelor's final project

PEER Review

Reviewed 1 article for the Journal of the Operational Research Society in 2026.

Teaching

Faculty of Engineering, University of Porto — Porto, Portugal

Invited assistant (Statistics)	September 2025 – January 2026
Monitor (Projeto FEUP)	September 2024 – January 2025
Monitor (Projeto FEUP)	September 2022 – January 2023

European Students of Industrial Engineering and Management (ESTIEM) — Europe

Lean Six Sigma Green Belt Instructor	Piraeus, Greece	April 2023
Lean Six Sigma Green Belt Instructor	Kaiserslautern, Germany	February 2023
Lean Six Sigma Green Belt Instructor	Aveiro, Portugal	December 2022

Extracurricular

Music
Involved in several projects as a keyboard player, lead singer, producer, and agent. I have experience with music production software and hardware and have also explored image and video editing tools.

Sports
Played football for 9 years. Besides that, I coached youth teams and integrated a referee team.

Skills & Interests

Technical: Python; R; Julia; SQL; Minitab.
Language: Portuguese; English (C1 level).
Interests: Sequential Decision-Making; Reinforcement Learning; Operations Research.
